Currently, Sarah Chianese utilizes a MacBook Pro with PowerPoint software, which has built-in HDMI port and provides VGA Adaptors. She has her own lavalier mic, which will need to be tested prior to the presentation to ensure everything is working smoothly.

- She will require the following:
- Projector
- Screen(s)
- Power Strip in place to easily plug her laptop into.
- Additional Mic (for audience interaction)
- A podium is not required and it is requested that the room be dimmed appropriately for the presentation.
- It is requested that any group over 25 have a PA system. For events requiring a microphone, use of her own (or one provided by the organization)
- Use of wireless lavalier is preferred so that the speaker can move freely at the front of the room.
- With that, please be mindful of the set up, especially the screen placement, as the speaker appreciates the opportunity to connect with the audience by moving around. Ideally, the speaker should have the ability to see the presentation, and still have the ability to walk around.
- If 16:9 slides (widescreen) are needed, please let the speaker know minimally (2) weeks in advance so adjustments to the presentation can be made.
- An audio-visual check with an onsite contact is requested 30 minutes prior to the start of the presentation.
